A carriage house is an outbuilding which was originally built to house horse-drawn carriages and the related tack. There is very little need in the modern world for true carriage houses. Accordingly, many carriage houses have been modified to other uses such as secondary suites and guest houses. Even today, such structures are still often called carriage houses in deference to their original function and regardless of their current use.

The Birch Carriage House by MossCreek features three bedrooms and open Kitchen/ Dining/ Living in a pleasant carriage house aesthetic. Modern living with a flavor of yesteryear.

Upper Level  
690 square feet

Main Level  
1,280 square feet
