The American bison is a North American species of bison that once roamed the grasslands of North America in massive herds. Their range once roughly comprised three quarters of North America.

The Bison by MossCreek, is equally suitable across North America with its robust selection of architectural details including Boston ridge vents, corbeled log brackets, tapered stone columns and a stone water table. Inside the Bison there is an open Dining / Kitchen area for spacious entertaining, Play Room, Den, and Sauna on the lower level. There are 3 bedrooms on the upper level. On the main level there is a Master suite truly designed for a master, and large open living spaces.
