The Mayfly is a favorite lure for many fishermen. When tied correctly, it can be an insatiable attraction for wild trout in almost any mountain stream.

The Mayfly by MossCreek can also be an alluring image in the mountains. Its small compact footprint features a full master suite, open kitchen and dining, great room, and an outdoor living room. A full master suite on all levels make this unit ideal for guests. The addition of a lockout basement also makes this an ideal plan for a rental cabin.
