Recalling visions of Western Juniper trees and snow capped mountains, the Pronghorn Lodge provides a solid sanctuary amidst a hostile environment. Large stone pillars, and a heavy wood truss frame a protective entry. Log, wood, and stone combine to create an exterior that is as wild as it is beautiful.

The Pronghorn Lodge features a main level with a Master Suite as well as Guest Quarters. The large two story Great Room is wrapped on three sides with a second story balcony. A large stone fireplace completes the rugged interior. The upper level features two bedrooms, a loft, and a game loft, all with excellent views of the surrounding landscape.

Upper Level  
1,222 square feet

PRONGHORN  
4,360 total square feet

Main Level  
3,138 square feet
