When England began to colonize North America, "Virginia" was the name Queen Elizabeth I of England gave to the area explored by the 1584 expedition of Sir Walter Raleigh along the coast of North America.

The Virginia by MossCreek captures this same colonial spirit with 3 bedrooms, 3-1/2 baths, including a master on the main level. A large Great Room with exposed timber trusses and an open Kitchen / Dining Room complete a dramatic interior. Antique logs, Amish timber frames, and historic finishes create an ambiance of early Americana.
